***Response to Amendment***

1. Responsive to communication received on September 09, 2003, amendments to claims 1, 3, 6, 8 - 14 are entered as requested.
2. In light of further explanation, objection to drawings and rejection of claims 1-14, based on § 112, 1<sup>st</sup> Paragraph, is withdrawn.

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-7 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter that was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

In claim 1, line 13, "if the number of data ports in the interface units is less than the number of switching data communications links in each switch plane,...". The examiner requests that a support for the underlined statement in the Specification be provided.

Art Unit: 2667

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter that the applicant regards as his invention.

Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 1 and 8, the phrase "a like data port" renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "a like"), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).

### ***Double Patenting***

5. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

6. A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

7. Claims 1-5, 8-14 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-5, 8-14 of copending Application No. 09/333,218.

This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

8. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

This is a provisional obviousness-type double patenting rejection.

9. Claims 5 - 6 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 5-6 of copending Application No. 09/333,218.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

10. Claims 1-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over of copending Application No. 09/333,218 in view of Chow et al. (US 5,999,528).

Claims 1-3, 10 and 11 Chow teaches: a switching plane 1, with a plurality of interface units (3A-3E), (Figure 1), where twelve data ports are designated for the interface units (Col. 6, lines 15-20), where the interface units connect to the switching plane through ISL5 communication links (Col. 6, lines 30-35), and determining a number of switching links to be up to 16 in number 0000-1111 (Col. 10, lines 27-39).

Chow further teaches method of determining which and how many ports of the UCS interface cards are to use (see col. 8, lines 59-67 and col. 10, lines 60-65).

Therefore it would have been obvious to one of ordinary skill in the art, to be able to utilize method of determining the number of data ports in each interface units, taught by CHOW, and be able to assign data ports of universal card slots to each data communication links in order to achieve maximum utilization of the switching core.

Claims 6-8, and 14 Chow teaches: that of the claim 1 rejection and, a table stored in memory for maintaining the active connection routes, where the table is indexed when VPI connections change status (Col. 12, lines 40-53), and (Col. 13, lines 1-4).

Claim 9 A processor makes the change updates to memory (Col. 15, lines 32-35) and (Col. 15, lines 50-55).

Claims 4, 5, 12 and 13 A Hub card is used to occupy exactly half of the switching fabric by consolidating the variable rate interfaces into one interface unit of consolidated bandwidth (Col. 6, lines 60-67) and (Col. 7, lines 1-8).

Art Unit: 2667

11. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
